

Pumping and mixing solutions for the starch and sweeteners industry

We care about your market

The production of starch and starch-based sweeteners presents processing challenges all the way from various raw materials (corn, wheat, rice, potato, cassava, pea, etc.) to a wide range of end products. The equipment used is exposed to fibers, entrained gases, slurries with a high solids content, and liquids with changing viscosities. Having the optimum pumps and agitators is therefore critical to ensure reliable and long-lasting operation. Sulzer offers the superior solution for all your applications. With thousands of installations around the world, our products have stood the test of time.

Proven expertise

We have core competencies based on close partnerships with key OEMs and end users. By working with Sulzer, you benefit from:

- Superior application knowledge with long experience
- High product reliability and quality
- Custom-engineered solutions to meet specific needs

Products that match

- State-of-the-art equipment for reliable operation in challenging conditions
- Wide choice of centrifugal and positive displacement pumps, agitators, submersible pumps and mixers, aerators, and compressors
- Energy-efficient products with low life-cycle costs and a smaller environmental footprint
- Special degassing pumps which can handle viscous suspensions with up to 40% air content

Service at your doorstep

Wherever you are, Sulzer is close by to bring personal, knowledgeable support and qualified services for the entire product life cycle, day and night. You can trust us to serve your installed base with our original Ensival Moret and Sulzer spare parts.

Process	P	M
Raw material washing (potato, cassava, etc.)	$\overline{\bigcirc}$	
Steeping (corn)	\bigcirc	
Milling or rasping	\bigcirc	\bigcirc
Separation and screening	\bigcirc	\bigcirc
Starch washing	\bigcirc	\bigcirc
Dewatering and drying	\bigcirc	
Refining (sweeteners)	\bigcirc	\bigcirc
Auxiliaries (power, cooling, etc.)	\bigcirc	\bigcirc
Water and wastewater treatment and re-use	\bigcirc	\bigcirc

Our extensive product coverage

Through a wide portfolio, we propose you the most adapted pumping, mixing and aeration solutions. Our high efficiency products with numerous options (dynamic seals, degassing systems, etc.) and certifications (Food Contact Materials Regulation EC 1935/2004) improve the performance, reliability and sustainability of your starch and sweetener plants.

Process pumps

AHLSTAR A process pump

AHLSTAR N non-clogging pump

AHLSTAR W wear-resistant pump

A, N and W self-priming and SNS process pump gas removal pumps

CPE ANSI process pump

Specialty pumps

CAHR axial flow pump

EMW slurry pump

ZPP and SMD double suction pumps

MC and MD

Vertical pumps

SIL vertical inline pump

NK/WK and VA/VAP vertical cantilever pumps

NV and VM vertical slide bearing pumps

SJT vertical turbine pump

Accessories

MBN multistage

Sulzer Sense

PD pumps

Herold pump

Agitators

SALOMIX SSF

SALOMIX SSA side-mounted agitator

Submersible pumps and mixers

AS submersible pump

Piranha submersible grinder pump

XFP submersible heavy duty pump

VUPX submersible propeller pump

SB and XSB flow boosters

Aerators and compressors

OKI submersible

Venturi Jet submersible aerator

XTA and XTAK

DDS disc diffuser system

HST™ turbocompressor

HSR turbocompressor

The Sulzer Flow Equipment division keeps your processes flowing. Wherever fluids are treated, pumped, or mixed, we deliver highly innovative and reliable solutions for the most demanding applications.

The Flow Equipment division specializes in pumping solutions specifically engineered for the processes of our customers. We provide pumps, agitators, compressors, grinders, screens and filters developed through intensive research and development in fluid dynamics and advanced materials. We are a market leader in pumping solutions for water, oil and gas, power, chemicals and most industrial segments.
